Search Notes

Attached are the search results for the apparatus and method of selecting and restricting players in a card game, including prior art searches in foreign and international patent databases; news, product, and general interest and sci/tech non-patent literature databases; and the Web via the Google search engines.

I did not tag any of the results because nothing seemed to me to be relevant. However, I recommend that you review all of the results.

Also attached is a search feedback form. Completion of the form is voluntary. Your completing this form would help us improve our search services.

I hope the attached information is useful. Please feel free to contact me (phone 305-5934 or email jeanne.horrigan@uspto.gov) if you have any questions or need additional searching on this application.

SEARCH REQUEST FORM

Scientific and Technical Information Center

Requester's Full Name: Dolores Collins Examiner #: 77384 Date: 6/30/04
 Art Unit: 3712 Phone Number 308-8352 Serial Number: 10775298
 Mail Box and Bldg/Room Location: CP2 10806 Results Format Preferred (circle): PAPER DISK E-MAIL

If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: Apparatus and Method for selecting and Restricting Play in a Card Game
 Inventors (please provide full names): Mike Tinpano CN
Class 273

Earliest Priority Filing Date: 2/10/03

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 3730

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

ABSTRACT: Cheating is a serious problem in network games, because we cannot see our opponent. One can use a reliable judgment server to solve this problem, but it is reasonable to assume, in the network society, that people trust nobody but only himself/herself. It is then important to play a network game securely without server, namely via peer-to-peer communication. There are several attacks to be considered. For example, in **card games**, attackers may control **card** shuffling or look at cards in the **deck** illegally. There is a protocol, so called a Mental Poker Protocol, to exclude these kinds of

attacks. In this paper, we consider the Gunjin-Shogi. Our goal of research is to develop secure protocols for this game and implement the game using these or **other** known protocols. (author abst.)

ABSTRACT: The process of **card counting** is discussed. **Card counters** are **blackjack players** who use a variety of systems to keep track of high-value **cards**, thus when they know that a relatively high number of those **cards** haven't been dealt, they know their odds of winning increase and raise their bets accordingly.

Peter Griffin, Solver of Blackjack, Dies at 61

Thomas, Robert McG Jr

New York Times, Sec B, p 11, col 1

Nov 2, 1998

ISSN: 0362-4331 NEWSPAPER CODE: NY

DOCUMENT TYPE: Obituary; Newspaper

LANGUAGE: English RECORD TYPE: ABSTRACT

LENGTH: Medium (6-18 col inches)

ABSTRACT: Peter Griffin, who called himself a simple algebra teacher but had such a winning way with numbers that he unlocked the mathematics of **blackjack** with a wink and became a cult figure to a generation of casino **card counters**, died on Oct. 18 at a hospital near his home in Sacramento, Calif. Mr. Griffin, who wrote the authoritative "'Theory of **Blackjack**,'" was 61 and had taught algebra and a good deal more as a professor of mathematics at the California State University there. Mr. Griffin, a native of New Jersey, grew up in Williamsport, Pa., Chicago and Portland, Ore., graduated from Portland State University and received a master's from the University of California at Davis. Although Mr. Griffin stands as a mathematical giant of **blackjack**, or **21**, as the game is also known, his book exploring and explaining the probabilities of every conceivable situation in the game was not published until 1979, 17 years after Dr. Edward O. Thorp's "'Beat the Dealer'" had presumably exhausted the subject, codifying the basic strategy and establishing that **players** could gain an actual statistical edge over the house by keeping **track** of **cards** as they were played and betting big when the remaining deck was rich in 10's and face **cards**.

BLACKJACK PLAYERS AND THE COUNT

St. Louis Post Dispatch (SL) - Thursday, March 28, 1996

By: Bob Rose

GET OUT Assistant Editor

Edition: FIVE STAR LIFT Section: GET OUT Page: 52

Word Count: 393

TEXT:

Blackjack is one of the best games in the casino for the **players**. By employing basic strategy, **players** can reduce the house advantage to less than 1 percent. A handful of **players** try to lower that advantage even

more by **counting cards** .

A simplified way to explain blackjack counting is that players keep track of two types of cards -- positive cards (nine, 10 or aces) and negative cards (two through six) -- and the total number of cards left in the deck. When a deck is full of positive cards, a player will bet more heavily.

Casinos try to thwart counters. They use six decks at a time to make the counting harder. **They sometimes reshuffle halfway through the shoe** so that players who count won't have such a big advantage, or they will simply ask card counters to quit playing.

So how much counting goes on in St. Louis? Are there a lot of math whizzes out there who can scan cards and keep multiple sets of running totals, all without raising the suspicions of the casino?

Tony Raymon, vice president and general manager at Station Casino St. Charles, says in the six-deck game it's "very rare." Dealers or pit bosses occasionally might suspect player behavior and suggest that certain players take their game somewhere else, but Raymon says nobody has been formally barred for counting at his casino.

"It's against the rules, but it's not really cheating," Raymon says.

Good players will always use some system of tracking or counting. It's the question of degree that puts the game in the gray area. A player might keep track of how many aces have been dealt. Is that person counting? Technically yes, but he won't run into any problem with the casino.

The bottom line on counting is that it's probably not as easy as the blackjack schools make it out to be--or as impossible as the casinos want it to be. In a six-deck game, even the best of counters won't have a sure thing.

The Name Game: What used to be the Casino St. Charles now will be known as the Station Casino St. Charles. The casino's parent company, Station Casino's Inc., will open Station Casino Kansas City in the fall. The company is hoping the name change will provide a more uniform identity for the properties.

VIC: CARD-COUNTERS BET ON BLACKJACK REVIEW
AUSTRALIAN ASSOCIATED PRESS
Sunday, August 5, 2001
WORD COUNT: 120

TEXT:

Blackjack

MELBOURNE, Aug 5 AAP - A review of the rules of **blackjack** will decide whether **card-counters** should be classed as cheats in Victoria. The Casino and Gaming Authority review, which was advertised yesterday, follows complaints by card players who say they are discriminated against by Crown Casino because of their card-counting skill. The review will examine whether blackjack is a game of luck or skill, and whether **card - counters** should be treated differently from other **players**. Gaming Minister John Pandazopoulos urged interested parties to respond to the review by the due date of August 31. Card-counting involves players keeping track of high and low cards as they are dealt to improve their odds of winning.

Crown Casino's blackjack rules face scrutiny after complaints
Age (AUSTRALIA)
Monday, August 6, 2001
WORD COUNT: 396

TEXT:

The Victorian Casino and Gaming Authority has started a review of **blackjack** rules at Crown Casino after complaints by gamblers who say they have been unfairly treated by the casino.

Melbourne law firm Slater and Gordon last year lodged a complaint with the gaming authority on behalf of professional gambler Andrew Scott over Crown's use of continuous card-shuffling machines.

Mr Scott claimed Crown unfairly discriminated against "skilled players", introducing tactics to stop them winning.

He said he had been either banned from playing altogether or had restrictions placed on him at Crown and other casinos around Australia. Gaming Minister John Pandazopoulos yesterday encouraged the public to respond to the authority's inquiry.

It will investigate whether blackjack is a game of chance or skill, if the casino can treat **card - counters** differently from other **players**, and the use of automatic **card** shufflers and the frequency of shuffling. The inquiry will also investigate whether card-counting presents a risk to honest gaming.

The rules of blackjack on the authority's website prohibit the use of a "device that is capable ... of recording, projecting or analysing an outcome of the changing probabilities or the playing strategies to be used".

Card-counting is a tactic used by players to keep track of the cards, thereby giving them an advantage. The frequency of shuffling prevents card-counters keeping track of the cards as effectively.

The investigation has been mooted for two years, since Mr Scott's first complaint to the authority, which has the power to regulate games and set the rules.

A Crown spokesman said yesterday that the casino would follow the rules as set down by the Casino and Gaming Authority.

The inquiry will accept written submissions until August 31.

Blackjack

* Also known as 21

* It is the most popular game at casinos around the world, and offers the best odds.

* The player attempts to beat the house, represented by the dealer, by obtaining a hand total that is higher than the dealer's and is equal to or less than 21.

* Between one and eight decks of cards are used.

* Each player, including the dealer, is dealt two cards and may draw more cards to reach 21.

* There are many different card-counting systems. One technique involves counting the number of high and low cards that are dealt, increasing bets when there are more high cards left undealt.

BeTheDealer.com - The Only Casino to Offer House Odds

CANADA NEWSWIRE

June 19, 2003

JOURNAL CODE: WCNW LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 720.

Now Introducing Multi-player Online Gambling The new version also features improved Gameplay, Graphics & Functionality CURACAO, June 19 /CNW/ - BeTheDealer.com, the world's first online gaming platform that **allows players** to enjoy the house odds, today announced the latest version of its peer-to-peer gaming platform allowing for up to three **players** to play against the house or against another **player**. By joining the BeTheDealer Casino community **players** can choose between the roles of **player** and dealer. As a **player**, BeTheDealer.com is a traditional virtual casino but, when **players** assume the role of dealer, they not only have an increase in odds playing as the house, but they share the excitement of being the **blackjack** dealer or even acting as the slot machine. With full multiplayer capability, users can play with up to three **players**, against a human dealer or the house, or switch sides and play against as many as three **players** as the dealer. In addition, **players** can chat in real-time while in a gaming session and benefit from 'continued game play' while a user is away from the table via

auto-approving **card** rounds when playing as the dealer. "BeTheDealer Casino combines the best of Internet gaming - a multiplayer capability with a transaction fee model using proprietary algorithms that, for the first time, **allow players** to become the house," said Alan Goning of BeTheDealer.com. "We are the only online casino in operation today that offers **players** the chance to be the house, enjoy the house odds and bridge the credibility gap that is commonly seen in traditional casinos between the **player** and dealer." BeTheDealer.com features eight different games to play ranging from video slots to poker. The Casino offers some of the best winning odds available - over 98 per cent - and has an average payout per **player** of \$350. Additional features in version 2.0 of BeTheDealer.com include progressive jackpots in the slot machine games and video poker. BeTheDealer.com software is available in English, Spanish, Italian, German, French and Dutch. It will also soon be available in Portuguese, Greek, Turkish and Chinese. Unlike other casinos **players** at BeTheDealer.com have the option of playing the traditional role of **player** as in any other casino, or to play as the dealer. As a dealer, **players** are afforded not only an increase in odds, but they also have the excitement of becoming the **blackjack** dealer, spinning the roulette wheel or even acting as the slot machine itself, while chatting with the other **players** and seeing their moves in real-time. BeTheDealer Casino uses the most advanced key encryption technology to ensure that sensitive data is transferred securely over the Internet. All communication is encrypted using SSL technology (Secure Socket Layer), which is the most widely accepted way of protecting data on the Internet. Each time a **player** logs into the system, the server automatically detects his/her IP. This is to assure consistency of locations from which **player** logs in. All the **player**'s personal details are stored on a secure server, which is protected by the latest Firewall systems. Launched only 18 months ago, <http://www.BeTheDealer.com> has already experienced phenomenal growth and it is one of the fastest growing online casinos, having hundreds of thousands of registered **players**, and a steady rate of over 20 per cent compound monthly growth. By using innovative methods and concepts, where **players** can become the house, the BeTheDealer platform is perfectly suited to change the online gaming industry and lead it into a new era. About BeTheDealer Casino Registered in Curacao and operating under a license granted by the Government of Curacao, Netherlands, Antilles BeTheDealer Casino (www.BeTheDealer.com) is the world's first and only person-to-person casino gaming platform, **allowing players** to take the role of the casino and win their opponent's money. **Players** can deal the **cards** or spin the roulette wheel, and receive the casino edge. Launched in January 2002 with patent pending software, the site was awarded Gambling Online's prestigious award for Best New Software Introduction in 2002. BeTheDealer Casino's unique software is proprietary, and was developed by CV on Net N.V. R&D group. CV on Net N.V. provides a total solution including software development, marketing, customer support and money processing including its own clearing facilities and services.

The proliferation of gimmick casino table games with signs that seductively call out "Let It Ride," "Caribbean Stud" and "Three Card Poker" has gambling halls looking like carnival midways these days. But if the flock of hopeful inventors displaying their new games of chance at the Global Gaming Expo, a gaming industry show in Las Vegas last month, was any indication, the gambling public can look forward to even more fresh ways to dance with Lady Luck.

Many new games are simply variations of old standards. The three mentioned above all spring from stud poker. Among the new games being pushed by hopeful creators at the Expo were a few based on **blackjack**.

One being demonstrated did not pit players against the dealer, but rather **allowed players** to bet on the type of hand they anticipated the dealer would get. **Players** had six wager choices from 17-or-under to **blackjack**. The dealer took four **cards**, and had to make the best possible hand from among those. A winning bet on...

iGames Entertainment Announces New Land-Based Casino Table Game For World Distribution

PR NEWSWIRE (US)

January 02, 2003

LAS VEGAS, Jan. 2 /PRNewswire-FirstCall/ -- iGames Entertainment Inc. (BULLETIN BOARD: IGMS) announced that the Company has reached an agreement to acquire, manufacture and distribute a new land-based casino table game, Table-Slots(TM).

Table-Slots(TM) blends the concept of slot machine play with traditional card play by matching slot machine symbols and characters dealt to each player for high stakes payouts on a standard size Blackjack table. Similar to slot machines, the object of Table-Slots(TM) is for players to wager on these symbols being dealt in certain winning combinations made up of three, four and five card orders **allowing players** up to three chances of winning each time a hand is dealt with odds and payouts varying with each winning combination.

"For many years, casinos have searched for a new and exciting game to bring the loyal slot player to the more traditional table games. Where other games such as Let it Ride(TM) and Caribbean Stud(TM) may have been intimidating to these players, Table-Slots(TM) is not. Table Slots(TM) offers high payouts to players, and adds the excitement, familiarity and interaction with other players where slot machines rely on single play. We believe that Table Slots(TM) will be one of the fastest spreading and most requested card table games to hit the casino market since Caribbean Stud," stated Jeremy Stein, CEO for iGames Entertainment.

ABOUT IGAMES ENTERTAINMENT

iGames Entertainment, Inc. (BULLETIN BOARD: IGMS) a fully reporting company, specializes in the development, manufacturing, marketing and distribution of gaming and security applications for the casino, hospitality, cable and sports betting industries within regulated

jurisdictions. Founded with the aim of producing government-approved casino gaming software, iGames Entertainment focuses on the creation of proprietary technology and is presently recognized for the Company's slot machine security technology, the Protector V.3(TM). The PROTECTOR(TM) Slot Security Device is a proprietary, patented security product of iGames Entertainment Inc. which is an add-on device that stops theft at the point of attempt for most major manufacturers of slot machines including IGT, Bally's and WMS machines. For a complete corporate profile on iGames Entertainment Inc., please visit the Company's corporate website at <http://www.iGamesEntertainment.com>. iGames Entertainment Inc.

Probe into blackjack rules

Greta McMahon

ABIX - AUSTRALASIAN BUSINESS INTELLIGENCE (HERALD-SUN) , p11

March 23, 2000

The rules of blackjack will be investigated. On 19 May 2000 the Victorian Casino and Gaming Authority (VCGA) will hold this inquiry. The move comes because of legal action by Slater and Gordon on behalf of Andrew Scott. Scott is a known card-counter. In 1999 Crown Casino in Melbourne made him a **restricted player** who can never bet more than \$A25 at a time. Scott is an accountant who teaches **card** -counting and claims that he could make up to \$A500,000 per year from Crown. Scott has been restricted at 12 of Australia's 13 casinos.

To crown it all, the card master shifts the odds by dealing a legal hand

ABIX - AUSTRALASIAN BUSINESS INTELLIGENCE (CANBERRA TIMES) , p5

May 04, 1999

Andrew Scott has instigated legal action against Crown Casino. Scott claims the casino is discriminating against him "for being too good". Scott, who is a **card counter**, has been limited to betting the minimum stake at the **blackjack** table he is playing at, and the dealers are instructed to shuffle the **cards** more often to remove the advantage of his **card counting**. Scott is also restricted to playing only one hand per table, which other **players** are able to play as many as they like. Scott's case is being heard by the Victorian Casino & Gaming Authority. Scott's case, prepared by Slater & Gordon, claims the casino's rules are in breach of the Casino Control Act

Odds stacked against a winner

ABIX - AUSTRALASIAN BUSINESS INTELLIGENCE (WEST AUSTRALIAN) , p9
May 04, 1999

When Andrew Scott sits down at a blackjack table in Melbourne's Crown Casino dealers greet him politely. They accept his money and then go to extraordinary lengths to make sure he does not get it back. Scott claims the casino discriminates against him not for being male or young, simply for being too good. Scott is known as a " **card counter** ", a **player** who turns the odds ever so slightly in his own favour by keeping track of the **cards** as they are dealt from the "shoe". He has taken his case to the Victorian Casino and Gambling Authority, lodging a submission which challenges the casino's rules of **blackjack** . Scott is on the "most unwanted list" at 12 of Australia's 13 casinos. He is yet to visit the 13th, the Reef Casino in Cairns

History Channel caught critics' attention with "Breaking Vegas" (April 4 premiere), a special that expands on "Bringing Down the House," the best seller about MIT grads who devised systems to win at blackjack. History will examine the unofficial MIT **blackjack** team, **card counting** , casino surveillance and cheating. Also of interest: the Keith Carradine-hosted series "Wild West Tech" (March), exploring the tech of the cowboy. But it goes beyond horse, saddle and rope to include an episode about brothel tech. (Did you know vibrators were invented in the 1860s and were steam powered? This dovetails nicely with Carradine's upcoming HBO sexy western series "Deadwood.") -- Last Oct, we raved about Fine Living's sommelier Andrea Immer's ability to de-mystify wine and pair libations with the right foods. We weren't the only ones, as Fine said it will renew "Simply Wine with Andrea Immer" for a 2nd season and add a 1-hour special "50 States-50 Wines." PR hand Sandi Padnos in her final TCA with Fine celebrated by letting Andrea be Andrea: staging a late-afternoon wine and food feast that had critics buzzing and got them buzzed. -- Fine will produce 13, 1-hour programs with The Wall St Journal Weekend Journal beginning in May, expanding to a regular weekly 30-min show in '05; content will come from the publication, including "Catalog Critic" and "Travel." -- Fine premieres "Life in the Fast Lane with Steve Natt" in March, aimed at educating viewers about vehicles, but also increasing their enjoyment of cars, motorcycles and other modes of transport. It also premieres "Your Reality Checked" (March), looking at the reality of chucking it all for a dream job. -- TechTV renewed "Unscrewed with Martin Sargent" and "Invent This," but not "Wired for Sex," with programming chief Greg Brannan saying "we just ran out of things to say about it...for now." (There must be a message there, Greg.) -- No word on the long-rumored G4-TechTV merger, although Brannan confirmed talks have occurred. Clearly, TechTV's not folding up: it previewed 2 shows at TCA: a series of tech competitions and their

participants called "Let 'er Rip" (2Q) and a series of 13 films about the subculture of geeks called "Nerd Nation" (Jan 19, 9pm ET). (Copyright 2003 PBI Media, LLC. All rights reserved.)

U. Michigan: BOOK REVIEW: Gambling narrative 'Poker Nation' folds

Ricky Lax
UNIVERSITY WIRE
April 03, 2003

JOURNAL CODE: WUWI LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 456

Andy Bellin's straight-to-paperback book "Poker Nation" is a how-to guide, expose and personal profile rolled into one -- a good thing, because none of these elements would make for a half-decent book on their own. "Poker Nation" is interesting and honest, but in the end, nothing special.

Bellin narrates his personal history of the game and, in the process, teaches the basics of Texas Hold'em poker and opens the doors of New York's illegal poker rooms. The book also covers the basics of probability mathematics, the story of Benny Binion's creation of The World Series of Poker, cheating with cards, gambling addiction and sex.

... watching the cards being dealt." Given Bellin's thorough knowledge of poker, his misunderstandings about card counting in **blackjack** are impressive. He wrongly claims that **card counters** "have Rainman-like abilities to memorize the position of the 416 cards in an eight-deck shoe." First, **card counters** don't memorize the position of **cards**. Second, not only are "Rainman-like abilities" unnecessary, this skill can probably be taught to...

Gambling Commission Says Atlantic City, N.J., Casinos May Reshuffle at Will

Amy S. Rosenberg

KRTBN KNIGHT-RIDDER TRIBUNE BUSINESS NEWS (PHILADELPHIA INQUIRER - PENNSYLVANIA)

July 19, 2001

JOURNAL CODE: KPIN LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 709

ATLANTIC CITY, N.J.--This group of **card - counting blackjack players** had a good thing going for about 10 months a decade ago as they pooled their money, split their winnings, and worked their way through the tables of Atlantic City's casinos.

But Dino D'Andrio, 71, a retired engineer from Marlton, and his cohorts haven't sat at the gaming tables in a decade, not since the casinos began shutting them down with strategies of their own. D'Andrio and friends have been trying ever since to challenge the rules that allow the casinos to count cards and shuffle the decks whenever they start favoring the players. The group even argued in a lawsuit that casino card-shuffling practices were in violation of federal racketeering laws.

... when to shuffle the decks.

In its own appeal brief in a case brought by **card - counter** teacher Doug Grant, the Casino Control Commission wrote that "even the least sophisticated **blackjack player** would not long patronize the **blackjack** tables at a casino which chose to shuffle the deck every time the deck was **player** favorable."

But the card counters say the 99 percent of patrons who don't count...

Fifty-Eight Patrons Allege New Jersey Casinos Cheat At Blackjack

BUSINESS WIRE

December 01, 1998

JOURNAL CODE: WBWE LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 516

NEW YORK--(BUSINESS WIRE)--Dec. 1, 1998--A group of casino patrons filed a petition with the New Jersey Casino Control Commission (CCC), requesting a hearing on allegations that Atlantic City casinos cheat at **blackjack**. Mr. Howard Altschuler, the group's attorney said "this petition filed by patrons is the first of its kind in CCC history, and promises to bring about long overdue reform of the casino industry in New Jersey."

The petition alleges that casinos secretly employ experts to **count cards** (a way to track when the odds favor casinos or **players**), who then selectively advise **blackjack** dealers when to remove **player**-favorable **cards** from a game in progress or otherwise illegally manipulate the rules to favor the casinos.

Patent No	Kind	Date	Applicat No	Kind	Date	Week
-----------	------	------	-------------	------	------	------

Patent Details:

Abstract (Basic): US 5328189 A

Each **player** assembles two **cards** dealt from the dealer face down in each of the first and second horizontal rows of boxes, the dealer assembling his four dealt **cards** in a dealer playing station face down in a manner corresponding to each **player**. At least one **player** makes a third bet in the extra **card** betting area of his playing station, the dealer dealing a fifth **card** to and placing that **card** face down in the third box of the playing station of the at least one **player** making a third bet. The dealer compares the **cards** assembled in each row of boxes in his playing area to **cards** assembled in corresponding rows of boxes in each **player** playing station. The dealer compares **cards** assembled in each row of boxes in each **player** playing station, wherein the **card** in the third box is appropriately summed with the **cards** in each of the first and second rows of boxes, and settling the second bets between **players** in each **player** betting area of each playing station.

US 5984308	A	7	A63F-001/00	

US 5984308 A 7 A63F-001/00

Abstract (Basic): US 5984308 A

NOVELTY - Initially **players** are given an option of making bonus
bet. After two **cards** are dealt to each **player** and dealer, the
player who made bonus bet is given an option to use additional **cards**.
If **player** decides to draw additional **cards**, he losses bonus wage,
if he elects to stand on his **cards count**, he is awarded a bonus and
if his two **cards count** exceeds than that of dealer's, his bonus is
enhanced.

USE - For playing wagering **black jack** game.

ADVANTAGE - Since the game allows possibility of winning with an
enhanced payment, excitement amusement versatility of game increases
and makes the game move interesting and enjoyable. Allows the **player**
who are not interested in making bonus bets, to p lay using previous
back jack rules.

DESCRIPTION OF DRAWING(S) - The figure shows the plan view of **card**
playing surface used for playing **black jack** game.

Abstract (Basic): US 20030232647 A1
NOVELTY - The system has a gaming activity **player** tracking unit

(25) in a gaming section (21) of a casino establishment that cooperates with **player tracking cards** to monitor gaming activity data of a respective customer. A non-gaming activity **player tracking** unit (27) in a non-gaming section (22) of the establishment cooperates with the **cards** to monitor non-gaming activity data of the respective customer.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for a method of tracking customer activity using **player tracking cards** .

USE - Used for tracking customer activity for a casino establishment.

ADVANTAGE - The patron movement throughout the casino establishment is monitored to provide the establishment a unique ability for maximizing customer service and promotions to each customer based on the gaming and non-gaming activity data.

DESCRIPTION OF DRAWING(S) - The drawing shows a block diagram of a **player tracking** system.

Abstract (Basic): US 6000699 A

NOVELTY - The method of playing card game of **twenty one** ' with side wager involves giving the player an opportunity to place a side wager that gives supplemental payout when a push' or tie results between the hands of player and dealer.

DETAILED DESCRIPTION - The method of playing **twenty one** ' card game with placing side bet **allows player** to split pairs in additional hands, if he has placed an initial side bet and placed side bets during subsequent hands. The amount of supplemental payout is progressively increased or the **player** is allowed to magnify the payout based on roll of a dice.

USE - For playing card game of **twenty one** ' with side wager used in casinos.

ADVANTAGE - The possibility of supplemental payout which may be magnified progressively and the increase of chances of player winning due to splitting pairs' in additional hands, increases the excitement of the game. The side wager' method is part of normal game and is simply integrated, hence the pace of the game is fast and as no complex method is involved, frequency of game is high.

English Abstract

Methods of playing **card games** (10) include the steps of affording each **player** (50-100) an opportunity to place an ANTE wager to participate in the game; dealing three cards to each player and to the dealer (20); affording each player an opportunity to either fold and forfeit their ANTE wager, or call by making a BET wager; evaluating whether the dealer's hand (40) qualifies by achieving a predetermined point value; and settling wagers by if the dealer's hand does not qualify, paying the ANTE wagers and refunding the BET wagers to each remaining player; if the dealer's hand does qualify, comparing each remaining player's hand with the dealer's hand using point value as the criterion for comparison, wherein if the dealer wins the hand the house wins the ANTE and BET wagers; and wherein if a player wins the hand, the player wins the ANTE wager and is paid on the BET wager.

English Abstract

One or more actual hands of playing cards are verified against respective expected hands of playing cards, to determine whether the playing cards actually dealt correspond to the playing cards that should have been dealt based on a starting sequence of playing card values. The starting sequence of playing card values can be computationally pseudo-randomly generated, where playing cards will be ordered, for example by printing or sorting, according to the sequence for distribution to the player and/or dealer. The starting sequence of playing card values can be determined by reading identifiers from a number of playing cards prior to dealing.

English Abstract

A method for supplying playing cards (12) in which indicia carried by the cards (12) is derived or selected randomly and applied to the cards (12) prior to dealing. The indicia carried by the cards (12) is removed after the game is played thereby allowing the cards (12) to be reused and have further randomly derived indicia to be applied. The apparatus (10) for use in the method includes a card delivery chute (26), an indicia removing device (25), a card storage device (11) in which cards (12) are stacked, and an image applying device for applying indicia to the cards (12) for delivery to a card feeding device (24) for playing a game. The method and apparatus may be applied to other game playing pieces and the cards and pieces may be in many different configurations and include an electronic display for displaying indicia.

Detailed Description

... for playing card or other games.

Background

Casinos and other gambling establishments use conventional playing cards for playing a number of card games for example **blackjack** and poker. Usually a number of decks of playing cards are provided at each gaming table with the cards being either shuffled by hand or by machine prior to being dealt to the players. One problem encountered in this conventional arrangement is that the effectiveness of the shuffle depends upon the skill of the dealer or the efficiency of the card shuffling machine to ensure that cards dealt are arranged randomly and this is often impossible or very difficult to achieve. Further as a finite number of cards are used in the decks that are shuffled, a problem of card counting can arise in that skilled individuals can count the cards being dealt to relatively accurately predict the next card to be dealt. Particular cards can also be susceptible to being marked which leads to potential cheating. A further disadvantage of the known arrangements is that a large number of decks of cards are used and decks of cards are required to be regularly replaced which leads to a substantial cost to the gambling....

English Abstract

Card games that combine the play of **Blackjack** ("21") with a 3-card Poker wager or side bet ("21+3"). Each player places a basic Blackjack wager (12) and an optional 3-card Poker wager (14) before the cards are dealt. Each player is then dealt a card with the dealer receiving a face-up card (16). Each player is dealt a second card. At this point, the outcome of each 3-card Poker hand is determined, where a 3-card Poker hand consists of the 2-card hand dealt to that player and the dealer's face-up card. After settling the Poker wagers, the game of Blackjack continues in a typical fashion. The invention advantageously retains all the features and advantages of Blackjack as well as provides the dynamics of 3-card Poker, without interfering with the card sequence, for enhanced player anticipation and enjoyment.

English Abstract

Systems and methods for playing live casino-type card games, in particular **blackjack**. The systems include a presentation unit (100) which has video displays (102, 103) which portray virtual playing cards (107, 108, 142) and other information at gaming tables (50) attended by live participants (56). Shuffling, cutting, dealing and return of playing cards (107, 108, 142) are accomplished using data processing functions within an electronic game processor or processors (90) which enable these functions to be performed quickly and without manual manipulation of physical playing cards. The invention allows casinos to speed play and reduce the risk of cheating while maintaining the attractive ambiance of a live table game. The processor (90) can also associate one or more slot symbols (941-6) with the virtual playing cards (107, 108, 142) so that jackpots can be awarded on the basis of winning slot symbols or combinations of symbols.

Fulltext Word Count: 41846

English Abstract

The invention is directed to a playing card dispensing shoe apparatus, system, and method where the shoe (10) has a card scanner which scans the indicia on a playing card as the card moves along and out of a chute

(16a) of the shoe by operation of the dealer. The scanner comprises an optical-sensor (41) used in combination with a neural network which is trained using error back-propagation to recognize the card suits and card values of the playing cards as they are moved past the scanner. The scanning process in combination with a central processing unit determines the progress of the game and, by identifying card counting systems or basic playing strategies in use by the players of the game, provides a way to limit or prevent casino losses and calculate the Theoretical Win of the casino, thus also providing an accurate method for determining the amount of comps to be given to a particular player.

English Abstract

A method of playing a modified **twenty-one** card game by at least a dealer includes the steps of placing a wager at dealer bet areas (18, 20, 22, 24, 26, 28). The player is awarded when the player correctly bets that the dealer will score at least one of a predetermined number of dealer outcomes, and playing the twenty-one game. The method also includes the steps of determining the score of the dealer, and comparing the score of the dealer to the predetermined number of dealer outcomes bet by the player. The player is awarded responsive to the wager and a coincidence between the dealer score and one of the predetermined number of dealer outcomes.

English Abstract

The present invention provides a machine (20) for shuffling multiple decks of playing cards including a first vertically extending magazine (110) for holding a stack of unshuffled playing cards, and second and third vertically extending magazines (116, 120) each for holding a stack of cards, the second and third magazines being horizontally spaced from and adjacent to the first magazine. A first card mover (182) is at the top of the first magazine for moving cards from the top of the stack of cards in the first magazine to the second and third magazines to cut the stack of unshuffled playing cards into two unshuffled stacks. Second and third card movers (184, 186) are at the top of the second and third magazines, respectively, for randomly moving cards from the top of the stack of cards in the second and third magazines, respectively, back to the first magazine to form a stack of shuffled cards.

Fulltext Availability: Detailed Description

Detailed Description

... Because of its popularity, the rapidity of play, and the need to reduce or eliminate **card counting** by **players**, **twenty - one** is usually played with multiple decks that are frequently shuffled. Thus, from the perspective of a casino, the play of a round of **twenty - one** takes a predictable length of time. In particular, the time the dealer must spend in...

...of wagers placed and resolved in a given amount of time. Modifications of the basic **twenty - one** game, including the LeVasseur modification, have been proposed to speed play or otherwise increase the ...twenty-one, making the games more exciting for players. It also reduces the effectiveness of **card counting** or tracking by **players** by enabling the shuffling of and play from multiple decks of **cards**. In use, the machine of the present invention is operated to repeatedly shuffle up to...

English Abstract

This invention is a playing card deck (20) for playing **blackjack** or casino **twenty-one**. The cards (40, 50, 60, 70) preferably have diagonally opposing primary (41, 51, 61, 71) and secondary (42, 52, 62, 72) corners. All cards in the deck have indicia or markings (43, 44, 53, 54, 63, 64, 73, 74) at the primary corners which indicate the nature of the card (suit and card-type). The deck has two groupings of cards. The secondary corners (42, 52, 62) of the first group (40, 50, 60) do not indicate the specific nature or count of the card. The secondary corners (72) of the second group (70), such as aces, have secondary indicia (76). This allows a dealer to selectively peek (32, 33) at the secondary corner of his face-down card to determine whether a blackjack hand exists. If **blackjack**

does not exist, then the dealer does not know the face down card and cheating or unintentional disclosure is prevented.

English Abstract

The method of the present invention involves a conventional live casino table game, or video machine type twenty-one game (also known as **Blackjack**), in which, in addition to a **player's** normal wager, a **player** (3, 4) has the option to make an additional bonus side-bet wager that makes the **player** eligible to win at a pre-selected ratio for having been dealt a predetermined combination of one or more of the bonus side bet cards (15). As well, there is the addition of **player** making a bonus side bet winning at a predetermined ratio when the dealer has a blackjack and the **player** has been one or more bonus side bet cards.

English Abstract

After **players** make their wagers, a dealer deals hands comprised of two cards to each **player** and a hand comprised of two cards to himself. When the **player's** hand as dealt has a predetermined point value (or one of a plurality of predetermined point values), the **player** is offered an early payout option (28). If the early payout option is elected, the **player** receives a portion of the original wager. In one embodiment, the early payout option is offered only when the dealer's hand is not a natural. In another embodiment, the early payout option is offered only if the dealer's face up card is a predetermined value (or one of a plurality of predetermined point values), such as ten.

English Abstract

The invention provides a highly attractive and entertaining device for displaying bonus prize objects. In addition, it provides **players** with the ability to participate in the selection of a bonus prize. The invention provides a gaming device (10) having a gaming apparatus (20) and a bonus display (12). The bonus display (12) indicates at least one of a plurality of bonuses using a mechanical bonus indicator (44). Each position of the indicator (44) includes at least two bonus prize, which may be selected by the player.

English Abstract

A device is utilized in casino gaming environment that will count the number of hands of a given card game played per given period of time. The information is used by a database system within the casino to determine theoretical win/loss based upon historical and theoretical outcome data related to probability of winning/losing any given hand and then factoring in the number of hands played. Preferably this device is polled by a database system to collect this information. In a preferred embodiment, the device could be utilized with an automatic tracking and information management system.

Main International Patent Class: **A63F-001/18**

Fulltext Availability: Detailed Description

Detailed Description

... way and provides for real time interactivity. The system should also be completely automatic. The **card game tracking** system should be one which is readily adaptable to be utilized with existing casino databases the personnel would be able to interact more readily with the **players**. Accordingly, the present invention satisfies such a need.

Patent Details:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
US 5944315	A	6	A63F-001/00	

Abstract (Basic): US 5944315 A

NOVELTY - The method involves making a **player** and a dealer designate one of their five cards as a **Joker**, so that each of them will have four cards and a **Joker**. The **player**'s cards are then compared with the dealer's cards. The **player** is declared the winner when the rank of his cards is higher than the dealer's cards. The **player** is then paid in compliance with the wager he set at the **start** of the poker game.

DETAILED DESCRIPTION - The method begins by making a **player** bet against the dealer at the **start** of the poker **game**. Three **cards**

are then dealt to the **player** , while two cards face up are dealt to the dealer. The **player** is then given a choice of either continuing the risk of the wager, surrendering and forfeiting half of the wager, and doubling or tripling the wager when the dealer's two face up cards are a pair. Two additional cards are dealt to the **player** while three additional cards are dealt to the dealer when the **player** does not choose to surrender his wager, such that each of the **player** and dealer has five cards on hand.

USE - For use in casino.

ADVANTAGE - Plays a **card game** that is more exciting than any other **card games** in a casino. Casino can retain an average of 14.4975 cents for every dollar contributed into the jackpot.

DESCRIPTION OF DRAWING(S) - The figure shows the plan view of the surface used in playing the poker game.

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
US 20010040344	A1		9	A63F-001/00	Provisional application US 2000174664

Abstract (Basic): US 20010040344 A1

NOVELTY - The kings, queens, and jacks of a standard 52 card
playing deck are revalued, with the 53rd card being a wild card. A
wager is accepted from a player, after which that player is provided a
hand. The player is paid winnings at increased odds in relation to the
wager should the hand include the wild card and a predetermined value.

USE - Playing a modified version of blackjack.

ADVANTAGE - The player will receive more entertainment value for
his wager and will have the possibility of receiving large bonus
payouts. The player will also enjoy having the additional wagering
opportunities offered by the liberalized doubling down and splitting
rules.

DESCRIPTION OF DRAWING(S) - The figure illustrates and embodiment
of the table for use in a gambling establishment, e.g. casino, to
practice the modified version of blackjack.

Abstract (Basic): CA 2330356 A1

NOVELTY - The method involves providing a 53 cards playing deck.
The 53 cards playing deck includes a standard 52 card playing deck
wherein the kings, queens, and jacks have been revalued, and a wild
card.

USE - Used for playing a modified version of Twenty One card game.
ADVANTAGE - Enables a player to receive more entertainment value
for his wager and will have the possibility of receiving large bonus
payouts. Enables a player to enjoy having the additional opportunities
offered by the liberalized doubling down and splitting rules. Improves
the player's odds of winning while also maintaining the house's
advantage. Improves fun and excitement of the game by using liberal
payouts, and play options.

DESCRIPTION OF DRAWING(S) - The figure shows the top view of the
blackjack table.

Abstract (Basic): US 6170828 B1

NOVELTY - A variation of **blackjack** is played with a standard deck of cards that is augmented by two jokers. A hand that includes the two jokers is called a natural. The natural outranks all other hands. A hand that includes one **joker** has a total point value of '21'. The player is permitted to hit, double-down, surrender or split a pair unless a face-up card of the dealer is a **joker**.

USE - Variation of the game of **blackjack** using **joker** cards.

DESCRIPTION OF DRAWING(S) - A plan view of hands of cards.

Abstract (Basic): US 5431408 A

The method of playing a **card game** comprising the steps of designating at least one card as a travelling **wild card**, displaying indicia of playing cards to at least one player which indicia form at least a partial card hand. The during the play of the at least partial card hand, providing the at least one player with the option of reserving the travelling **wild card** for use in a subsequent hand if the at least one player has been displayed a travelling **wild card** for use in the at least partial card hand.

At least one player receives a replacement card if said at least one player decided to reserve said travelling wild card for use in a subsequent hand.

ADVANTAGE - Increases the player's excitement and enjoyment, as well as the level of player participation by providing a player with an opportunity to maximize the impact of receiving a wild card and is readily adaptable to wagering which is relatively simple to learn for a new player and which can be played quickly.

CARD GAME TOOL

PUB. NO.: 09-070467 [JP 9070467 A]

PUBLISHED: March 18, 1997 (19970318)

INVENTOR(s): FUKUI YASUYO

APPLICANT(s): FUKUI YASUYO [000000] (An Individual), JP (Japan)

APPL. NO.: 07-351111 [JP 95351111]

FILED: December 13, 1995 (19951213)

ABSTRACT

PROBLEM TO BE SOLVED: To provide cards capable of enjoying games such as word matching and a cap verses game, etc., in addition to the various kinds of the games based on a playing card as a card game tool using HIRAGANA (cursive form of Japanese syllabary), KATAKANA (square form of Japanese syllabary), alphabets, pictures, patterns and colors and to be useful for the education of words and the encouragement of calculation ability by point calculation.

SOLUTION: This card game tool can be used by the HIRAGANA, the KATAKANA and the alphabets as well for which row numbers to which small characters and sonant marks are added, the alphabets and the symbols of '?' and '!', etc., are added to 46 sheets from 'A' to 'N' in a Japanese alphabetic order. One side is mentioned in an optional color and the other side is mentioned in a different optional color. Further, a joker is added and a complicated game is performed.
